Financial & Risk Analysis

Objective

To analyse the financial performance, risk exposure, transaction volumes, revenue composition, and customer demographics of the company's marketing campaigns.
This task builds on evaluating financial health and identifying strategic opportunities.

Methodology

- Imported and cleaned the dataset in **Power Query**.
- Built a **Date Table** and applied **DAX measures** for KPI computation.
- Created interactive visuals for profit, ROI, fraud, and revenue.
- Designed executive-style dashboards with slicers, tooltips, and navigation buttons.

Key Financial Insights

Metric	Value	Insight
Revenue Sum	High across Google Ads	Indicates strong conversion efficiency.
Profit Sum	Positive upward trend	Reflects sustainable cost control.
Profit Margin %	17–25% range	Healthy profitability.
ROI %	Highest in Google Ads	Most cost-effective campaign.
Fraud Rate %	4.77 %	Acceptable but should be monitored.

Risk Analysis

- Chargebacks / Failed Payments:** Card-based payments account for most fraud incidents.
- Recommendation:** Implement stronger payment verification and monitor high-risk regions.

Transaction Volume Analysis

Transaction volume increased steadily between 2020 – 2022.

Peaks observed during promotional months suggest seasonal opportunities.

Revenue Breakdown

Google Ads drives the highest revenue share.

YouTube and Meta Ads contribute to reach, but at lower margins.

Suggest allocating more budget to high-ROI channels.

Customer Demographics

Male customers dominate (~98%), with limited data on females.

Top regions: **Australia**, **United Kingdom**, **Germany**, **France**.

Potential to expand engagement through localised or gender-inclusive campaigns.

Visual Summary

The dashboard includes:

- **Profit & ROI Trend by Campaign****
- **Revenue by Region****
- **Fraud by Payment Method****
- **Demographic Distribution****
- **KPI Cards****

Conclusion

The company's financial position is stable with strong ROI from Google Ads and low fraud risk. Future efforts should emphasise ****fraud prevention****, ****diversified customer targeting****, and ****budget reallocation toward high-ROI channels****.
